“Customize Your Home
TODAY!”

Add 5% or MORE to the value of your home by customizing your home with new garage doors and THE EYEBROW!

The Eyebrow is a decorative architectural accent that transforms the plain boring area located above garage doors to one of style and beauty. Our product is made of fiberglass and is significantly stronger and longer lasting than any wood or vinyl product on the market. The Eyebrow can sit alone above the garage door to add a “customized” look to your home; or, if you’re a gardener, grow vines to get that “old world charm” appearance.
